BrightAuthor:connected **RELEASE** **NOTES**

Version 1.6.6

BrightSign, LLC. 983-A University Ave., Los Gatos, CA 95032 | 408-852-9263 | www.brightsign.biz

Changes Since v1.6.2

New Features

- BCN-7359: Added Expand All button to Presentation variables, allowing users to view details of all variables.

Improvements

- BCN-5884: Presentation tree view is now selectable and interactable.
- BCN-7849: Attempting to add a Video plugin when there are no more valid plugins now gives a clearer error message.
- BCN-4250: Improved state selection to allow for multiple state selection and dragging.
- BCN-7487: When manipulating interactive states and events, dragging should be more consistent.
- BCN-7591: Improved Timeout behavior to be more consistent with BrightAuthor.
- BCN-8060: Improved visibility of BSN.cloud Source list presentations beyond the 15th presentation on the schedule tab.

Bug Fixes

- BCN-7462: Fixed an issue that would cause image size to be incorrectly determined by EXIF data.
- BCN-7353: Alphabetize Variables checkbox now behaves as expected.
- BCN-6995: Publishing a presentation should now always prompt the user to save.
- BCN-8156: Loop mode will no longer be turned off automatically when synchronization is enabled.

- BCN-6553: Fixed a fatal error that could occur when modifying the schedule.
- BCN-7938: Changed tag behavior to remove trailing spaces, which could cause playback failure.
- BCN-8280: HTML localStorage should now properly persist after power cycling a player.
- BCN-8091: Fixed an issue that blocked autorun minimum firmware checks from completing.
- BCN-8200: Send UDP should now behave as expected when opening presentations from earlier versions.
- BCN-5969: Fixed an issue that could cause two different times to display for a presentation on the schedule.
- BCN-7573: Fixed an issue that would cause tagged players to error when called by a tagged playlist.
- BCN-3743: Adding an HTML site to an empty folder or file will no longer display an error and reload the previous save of the active presentation.
- BCN-8433: Removed incorrect duplicate in Content Check Frequency drop down.
- BCN-8196: Fixed a crash that could occur when navigating to the library when editing a presentation.
