BrightAuthor Release Notes

Version 5.0.0.3

XCx55, XTx44, XDx34, HDx24, HS1x4, LS424, XTx43, XDx33, HDx23, HO523, HS123, LS423, 4Kx42

Changes Since 4.7.2.18

Content encrypted networks are not supported on Series 5 players on the currently available OS. This will be resolved in a future OS release.

Presentations published to XC5 players on OS 9.0.15 must be authored with 'Full resolution graphics' enabled.

New Features

- Added support for the XC5. New feature support for XC5 is up to 8K video modes. Multi-output is not supported using BrightAuthor.
- BCN-12189: Added BrightWall support for Series 5 models

Bug Fixes

- BCN-12367: Fixed BrightAuthor crash when cancelling "Standalone unit with setup" publish to the "Local Storage" option
