# BrightAuthor:connected RELEASE NOTES

Version 1.6.52

BrightSign, LLC. 983-A University Ave., Los Gatos, CA 95032 | 408-852-9263 | [www.brightsign.biz](http://www.brightsign.biz)

## Changes Since v1.6.44

### New Features

- BCN-7201: Added support for WPA-Enterprise and 802.1X configurations.
- BCN-4251: Added undockable panels.
- BCN-5226: Internal IP addresses can be seen on the properties sheet on the Network tab and the device list column.
- BCN-7814: Uploading a second version of an asset will now prompt the user to rename or replace the previous asset.
- BCN-7609: Added the ability to view the number of subscriptions available in a network.
- BCN-8717: Added Audio Output reassignment reminder when reassigning serial ports.
- BCN-7595: Added support for playing the audio component of video files to the AU3x5 player family.
- BCN-7755: Added support for mobile data through Vodafone.
- BCN-8518: Added Modem and Cellular information to the Network tab.
- BCN-8447: Partner application setups can now be set via SD card setups.
- BCN-8625: Added update interval options for media feeds for Live Feed and Tagged playlists.
- BCN-3987: Widgets can now snap-to-grid.
- BCN-9358: Modem information can now be seen in the property sheet.
- BCN-8884: Added new content preview window to the righthand panel.

- BCN-9037: Touch control for a player is now available through the remote client.
- BCN-9847: Added new rollback feature to the supervisor.
- BCN-9856: Added new warnings when trying to name a presentation or asset to a file name that already exists on the network.
- BCN-10003: Added check box to propagate settings to BSN.cloud to script plugins.
- BCN-10165: Added audio configuration option to AU3x5 Players.
- BCN-10466: Added default gateway and IP to range validations in Device Setup.
- BCN-10179: Added WPA UI validation.
- BCN-9072: Added user variables to Zone Resize values.
- BCN-9875: Players with only Wi-Fi interface enabled now start an access point for network configuration.
- BCN-8138: Users can now set USB interface type and priority for Ethernet, USB, Wi-Fi ports and VLAN.
- BCN-10143: Added popup dialog warning that scripts may need to enable Property Lock.

## Improvements

- BCN-9911: Optimized dragging and dropping devices between groups.
- BCN-9455: Removed the “Double Click to Edit” text from Layout Canvas.
- BCN-5809: Added device and presentation metadata to the LFN device list tooltips.
- BCN-9098: Disallowed characters are now blocked in Tag names.
- BCN-5490: File and component names are now truncated to prevent exceeding BSN limit.
- BCN-7520: Improved boot times for players with intermittent internet connection.

- BCN-10019: Improved performance when navigating between tabs.
- BCN-6926: Live text layer menus can now be expanded and collapsed like other property sheets.
- BCN-7126: Network roles can no longer be deleted while in use.
- BCN-7419: Player autorun will now start at the earliest opportunity.
- BCN-7662: Improved BrightLink and BrightMenu boot times.
- BCN-7723: Switch presentations will now have 'Please select file' pop up appear when attempting to validate with no selected file.
- BCN-9102: Proxy setups now allow URLs with IP addresses.
- BCN-8777: Improved empty device list messaging.
- BCN-8841: Players using the BrightSign modem now reports IMEI, ICCID, signal strength, and important error conditions to the properties sheet.
- BCN-6309: Removed irrelevant menu items from the tabs.
- BCN-9127: Command zone resizing changed from 'Top' and 'Left' to 'X' and 'Y'.
- BCN-9142: Changed "Enable Limit Storage" to "Enable Reserve Storage".
- BCN-9597: Changed wording in Device Setup and the Property Sheet to match.
- BCN-9642: Players will now prioritize Ethernet over Wi-Fi unless specified.
- BCN-9763, BCN-9766: Property lock is enabled by default when using Partner Applications.
- BCN-9848: Invalid widgets are now hidden for AU3x5 players.
- BCN-10145: Presentation Properties now has the Property Lock checkbox unchecked by default.

- BCN-10158: Added version warning to USB settings tab.
- BCN-10207: Time server settings are now under New Device setups.
- BCN-10269: Interface Priority drag, Save, and Reset are disabled when Device Property changes are disabled.
- BCN-10279: The setup process now auto-updates the OS to 8.0.146.
- BCN-10459: Default gateways allow 0.0.0.0 if users do not want to specify a gateway.
- BCN-10610: Partner application setups now have default group name.
- BCN-10006: Changed modem signal strength from dBm to a 10-point scale.

## Bug Fixes

- BCN-9832: Fixed Content Cloud based HTML sites failing to find asset files.
- BCN-9507: Fixed imported BrightAuthor presentations losing HTML site query strings.
- BCN-9508: Fixed Between operator not working as intended.
- BCN-9428: Creating an On Demand state for a presentation will no longer change the selected variable.
- BCN-9387: Fixed Wi-Fi fallback not working when players were unplugged from ethernet.
- BCN-6906: Uploading a presentation containing a plugin should no longer fail.
- BCN-9474: Fixed SFN players with eth0 port enable being unable to download presentations via Wi-Fi.
- BCN-9280: Fixed presentations randomly restarting.
- BCN-8665: Fixed needing to reapprove items in a Tagged Playlist.
- BCN-9525: Fixed being unable to rename a file after uploading via local DWS.
- BCN-9601: Fixed Control Cloud Admin being unable to access User Management.

- BCN-8279: Fixed crash when saving a setup file under a new name.
- BCN-9427: Adding an On Demand state to a presentation will no longer remove the Use variable option from selection.
- BCN-9633: Fixed backspace/delete keypress when making a new folder in Content Cloud clearing out the file queue instead of acting on the name string.
- BCN-8338: Fixed spaces being deleted from the middle of a tag value.
- BCN-8442: Fixed a crash when using the incorrect password in a SFN publish.
- BCN-9108: Fixed Device Setup UI breakage after saving a Partner Application setup.
- BCN-10052: Double clicking on a folder in the content library tab will no longer cause a crash.
- BCN-10083: Clicking on an empty area in a Dynamic playlist will no longer deselect selected files.
- BCN-5275: Fixed DWS Authentication field being inaccessible.
- BCN-6786: Removed the ability to edit Disabled Players presentations, causing a fatal error.
- BCN-6953: Fixed players not rebooting when they should during setup.
- BCN-7020: Default plugin names no longer contain invalid characters.
- BCN-7113: Changed all 'Timeout' labels to read 'Timeout event'.
- BCN-7175: Fixed unsaved changes pop up dialogue not showing after making changes to a tagged playlist.
- BCN-8089: .webm files should now be visible.
- BCN-8191: Fixed DWS UI not fully loading.
- BCN-7784: Removed non-existent model from device package creation page.

- BCN-8349: Fixed “Scroll to load more...” displaying in media folders when there are no remaining content pages.
- BCN-8355: Fixed Zone layout view failing for AU3x5 players.
- BCN-8365: Fixed fatal error when publishing with BSN Setup using an older setup package.
- BCN-8390: Fixed Content Cloud players without a subscription displayed as ‘Green’ status on the Network list.
- BCN-8452: Fixed incorrect unit labels in device setup UI.
- BCN-8463: Fixed label inconsistency in the content section for switch presentations and auxiliary files.
- BCN-8475: Fixed multi-selecting the same state type to allow users to set the same number configuration to both.
- BCN-8689: Script ‘Relates to’ section should now show presentations using the script.
- BCN-8703: Entering the wrong password when initiating the 30 day trial will now prompt you to try again.
- BCN-8795: Fixed error when refreshing Application Preferences page.
- BCN-7333: Fixed Presentation names including the file extension suffix in the name when switching to them.
- BCN-8781: Fixed HTML site names not being cleared when the Super State containing it is deleted.
- BCN-9164: Save button is disabled when certificate name is blank.
- BCN-9203: Fixed error when disabling logging if Upload Logs is enabled.
- BCN-9403: The “Default” group can no longer be deleted.
- BCN-9538: Fixed SFN players failing to register Wi-Fi interfaces.
- BCN-9559: Fixed Wi-Fi configuration not requiring SSID and password.

- BCN-9647: Info button now properly redirects to the Dashboard.
- BCN-9712: Fixed players not keeping time zone settings on reboot.
- BCN-9745: Fixed RDWS Power save returning a 500 error.
- BCN-9736: Saving a device setup to an SD card with OS updates selected will no longer result in a transfer failure.
- BCN-10027: Fixed crash when selecting the schedule tab if LWS devices were present.
- BCN-10168: User Variable Dropdown now properly appears for Demand List content.
- BCN-10192: Fixed a bug that prevented the creation of a tagged playlist.
- BCN-10244: LFN cancel button now works as expected.
- BCN-10288: Corrected Network Device List Uptime mapping.
- BCN-10317: DWS password field should now work as expected during Device Setup.
- BCN-10343: Fixed fatal error when navigating to Schedule tab.
- BCN-10347: Hostname is now persistent.
- BCN-10394: Fixed player error logs and last content download section being empty.
- BCN-10410: Fixed error when attempting to specify IP and Default Gateway property values.
- BCN-10421: Fixed a crash when signing out in content tab.
- BCN-10474: Fixed scroll to load more in Presentation and Schedule tab.
- BCN-10081: The proper error message now displays when the property sheet is disabled.
