BrightAuthor:connected RELEASE NOTES

Version 1.7.7

Changes Since v1.7.3

New Features

- BCN-11331: Custom Device Webpages now support HTTPS.
- BCN-11295: Added "Allow Automatic Changes to Tagged Playlist" checkbox.
- BCN-10469: Added drop down suggestions when entering tag values.

Improvements

- BCN-11257: Changed default image display duration in Tagged Playlists to 6 seconds.
- BCN-11151: Presentation Zone labels now use the same zero point (Top, Left) across editors.
- BCN-7225: Improved tagging drop down menus.
- BCN-7228: Changed Order Content to a pick list.
- BCN-7156: Tags should appear in a suggestion drop down across players in the same network.
- BCN-11138: Validity start and end dates can now be updated using REST API.
- BCN-11287: Navigating off content with unsaved tag changes now prompts the user to save.

Bug Fixes

- BCN-11387: Fixed menu item misalignment on smaller resolutions.
- BCN-11325: Fixed video stream URLs passed as a user variable missing URL options.
- BCN-11297: Fixed retrieval errors leaving open connections until timeout.
- BCN-11294: Fixed player setup location information failing to resolve via external IP address.

- BCN-11279: Fixed crash when attempting to publish to local storage when "Publish with BSN Setup" is checked.
- BCN-11239: Fixed schedule start date default to be present date instead of 1970.
- BCN-11229: Fixed Unlock User message.
- BCN-11056: Unsupported date and time values are now invalid.
- BCN-11016: Fixed recurring events with no end date causing never ending boot cycle.
- BCN-10804: Fixed failure to save an imported livetext presentation after changing the background image.
- BCN-10295: Fixed creating a network with a name that exceeds the character limit giving the wrong error message.
- BCN-10188: Fixed drag and dropping content between folders causing corruption.
- BCN-9992: Fixed Dynamic Playlist asset view not being able to scroll to the final asset.
- BCN-7221: Fixed User Tag values no auto-populating in content and tag playlist rules list.
- BCN-7229: Fixed autocomplete failing to show all tag keys.
- BCN-7495: Fixed tagged playlists experiencing 405 errors.
- BCN-9709: Fixed array tags to show on any match instead of the entire array.
- BCN-10470: Fixed drop down menu not appearing if a tag name was never entered for a player before.
- BCN-10991: Fixed previous tags not appearing on other pieces of content.
- BCN-10992: Fixed tag values requiring a double click instead of single click to edit.
- BCN-10998: Fixed tag string arrays allowing numbers for the value but not returning anything in a search.

- BCN-11002: Fixed tagged playlist switching content incorrectly when a time interval is set.

- BCN-11003: Fixed content updates for tagged playlists failing.

- BCN-11004: Fixed error that would cause tagged playlists to fail to save.

- BCN-11006: Fixed media rules not finding the appropriate tags.

- BCN-11007: Fixed media rules adding "image, video, audio" to tags.

- BCN-11054: Fixed crashing on tagging approval.

- BCN-11212: Fixed error when saving tagged playlists back-to-back.

- BCN-7529: Media files deleted from tagged playlists should no longer continue to play on players.

- BCN-10990: Fixed deleting a tagged playlist displayed an error log on all following operations.

- BCN-10995: Fixed crash when refreshing tagged playlist library.

- BCN-10996: Fixed crash when opening tagged component section.

- BCN-10997: Fixed the application becoming unresponsive while loading Next Tagged Playlist page.

- BCN-11286: Removed extra text from tagged playlist names in the asset section.

- BCN-11420: Fixed Control Cloud Dashboard menu items appearing in the middle of the screen.

- BCN-11404: Fixed fatal error when creating a new presentation after editing an existing presentation.

- BCN-11398: Fixed Media properties missing from files.

- BCN-7221: Fixed User Tag values not auto-populate in content or tag playlist rules areas.
